FRUITY CHUTES

Matrice 200/210 Bundle Quick Start Guide

Thank you for buying the Harrier Parachute Launcher bundle for the Matrice 200/210. These resources are on our website. Here are direct links to help you get started!

WARNING: Be sure to go through each section carefully. Let us know if you have questions. In the event of an emergency, an improperly rigged parachute can result in a crashed drone.

1. Matrice 200/210 Help: http://bit.ly/2OvtjNb

2. Prepare and Load the Parachute: http://bit.ly/2A5zsZv

3. Using the Skycat Rescue Radio: http://bit.ly/326s8Lu

Note: If you purchased the rescue radio option, the Nano receiver comes mounted inside the SATS-MINI case. The transmitter comes pre-bound to the Nano receiver. Activating the Rescue Radio parachute eject button (pressing silver button) will cause the SATS-MINI to eject the parachute. This is assuming the SATS-MINI is armed (the red mode light is flashing).

4. Using the SATS-MINI failsafe:
   http://bit.ly/32su0ce

Note: Unless otherwise indicated, SATS-MINI are shipped preconfigured for the Matrice 200/210 parachute system. The SATS-MINI is pre-calibrated for the front of the battery pack holder (on the flat section) and mounted with the antenna exiting the case downward and the servo connectors up. The Harrier Launcher servo connects to Channel 1. We do recommend downloading and installing the Windows UI program "Shooty Chute." This lets you tune the settings as well as download and manage the black box flight log

If you have any questions, please contact us at Fruity Chutes: http://bit.ly/2DLVz4G

Be sure to ground test your setup!
